

Increasing and Enhancing Effective Digital Opportunities for refugees and migrants

Supporting Refugee Communities
with Digital Self-Learning

PRESS RELEASE

The IEEDO (Increasing and Enhancing Effective Digital Opportunities for refugees and migrants) project is driving a groundbreaking initiative to equip refugees and migrants with essential digital self-learning skills, fostering resilience and autonomy. Through innovative e-learning resources and gamification-based tools, IEEDO empowers individuals to overcome challenges and take charge of their learning journey.

Revolutionizing Learning through Gamification

At the core of IEEDO lies a game-based learning resource, empowering users to learn independently. This resource not only offers a qualitative learning experience but quantifies progress. With tailored learning pathways, IEEDO ensures customized sessions of 'playability,' enabling hours of autonomous learning.

Comprehensive Support with Moodle Platform

In tandem with the game-based resource, IEEDO provides a Moodle platform for coaches, trainers, and mentors supporting refugees and migrants. The project is dedicated to enhancing digital self-learning skills, both for the beneficiaries and those assisting them in their integration.

Empowering Coaches and Tutors

A key component of IEEDO is the Coaching Curriculum Programme, designed to guide coaches and tutors working with refugee learners. This program outlines objectives, skills, and competences through a modular framework. It includes tools like the Training Needs Analysis Assessment Tool and a Learning Action Plan.

Envisioned Impact and Intellectual Outputs (IOs)

IEEDO envisions transformative refugee integration by addressing learning needs. The project's key outputs are:

- Coaching Curriculum Programme: Supporting Digital Self-Learning (IO2): A comprehensive curriculum tailored to coaches and tutors, specifying learning objectives and content.
- The IEEDO Digital Kit for Resilience in Self-Learning (IO3): An interactive e-learning resource employing game-based approaches to develop digital self-learning skills.
- Pedagogical Guide and Digital Resource Pack for Coaches (IO4): A Moodle platform offering tools, techniques, and case studies for coaches, supporting them in aiding refugee learners.
