SELCERT: Skills Development and certification for trainers of synchronous electronic learning

What is SELCERT about?

An Erasmus+ project that aims at developing a qualification framework for trainers that deliver Synchronous Electronic Learning.

Online training also known as computer-based training, synchronous electronic learning, distance learning or e-learning is a form of instruction that takes place through the use of ICT and the internet. These few past years have revealed many benefits of electronic learning in terms of time saving and accessibility.

The SELCERT project aims at enhancing quality electronic learning. Quality e-learning requires special training skills. These skills are created and supported by SELCERT through a qualification (ISO certified) for trainers that deliver Synchronous Electronic Learning accompanied with training materials and tool, as well as a certification.

In order to achieve this quality enhancement, SELCERT produced the following results:

- A qualification framework for trainers that analyze, design, develop, implement and evaluate online trainings
- Curricula, materials and digital methodological tools to train the web trainers
- A digital assessment tool
- A digital resource centre networking tool
- A multimedia guide on how to adapt different techniques on different platforms
- A best practice guide for the delivery of online learning

You can find all project results here: <https://selcert.projectsgallery.eu/results/>

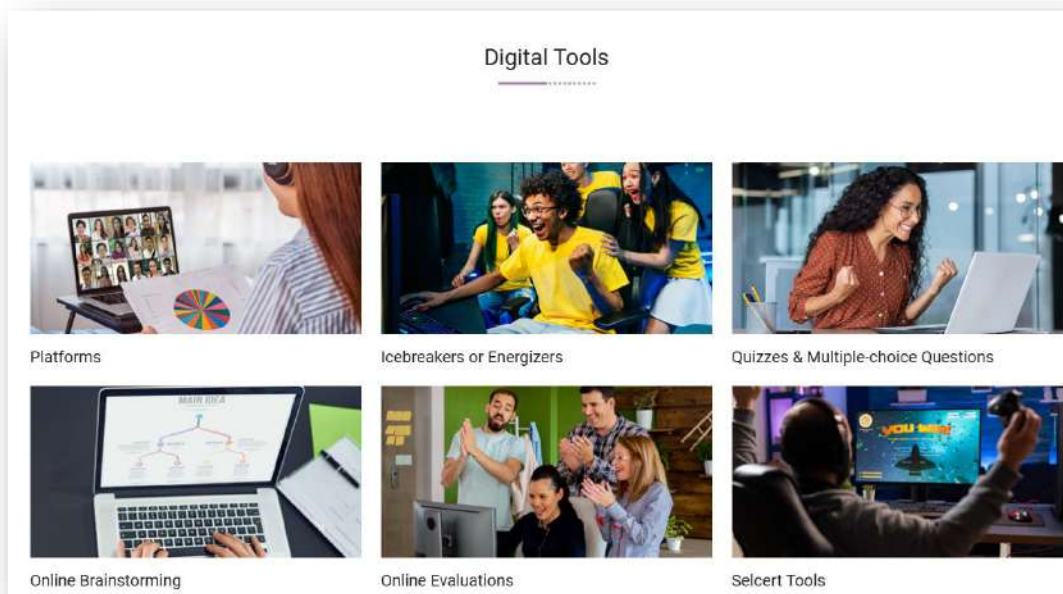

Project Result 6: Digital resource center and networking tool for synchronous electronic learning (SEL) trainers

This result has two levels. On one level, is the networking tool for all the SEL trainers that will be certified during the project or after the project's life-cycle. Also, for anyone else who might be interested or delivers synchronous online training or might be interested in the qualification. On another level it is a resource center with different resources and ideas that the trainers may use when they train.

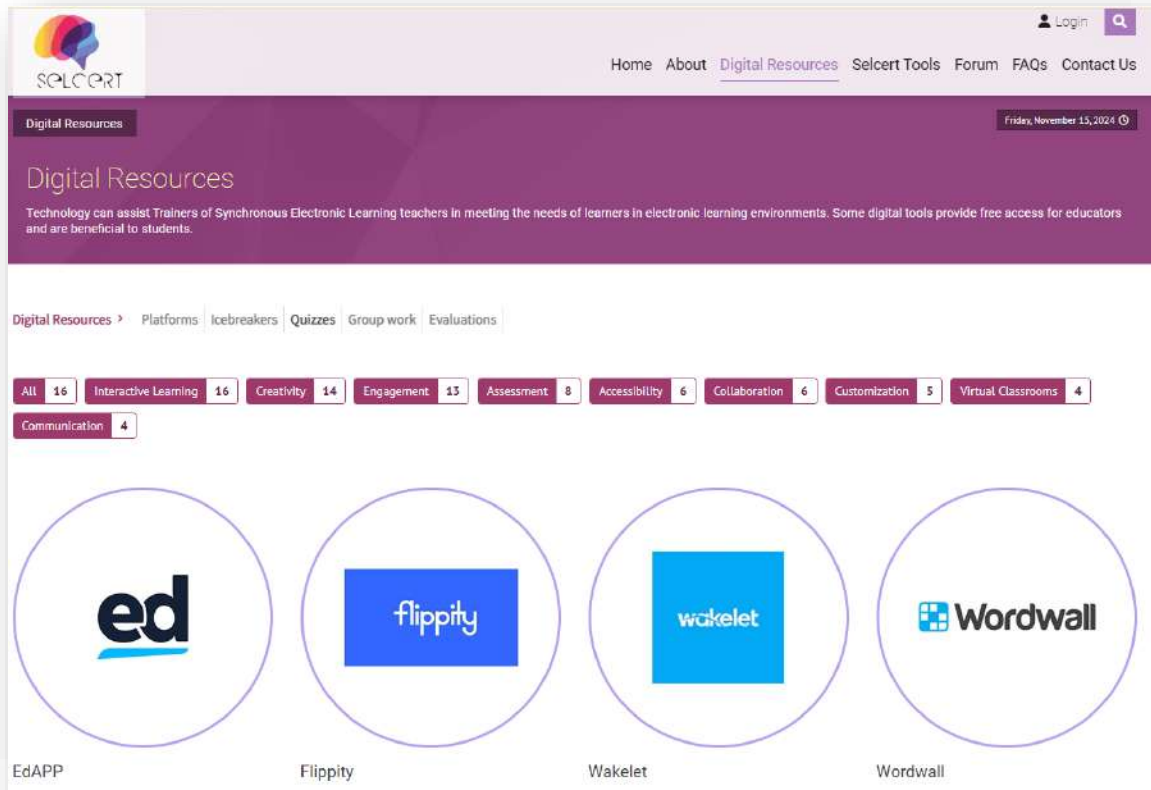

You can visit the Digital resource center on this link: <https://selcert.app-host.eu/>

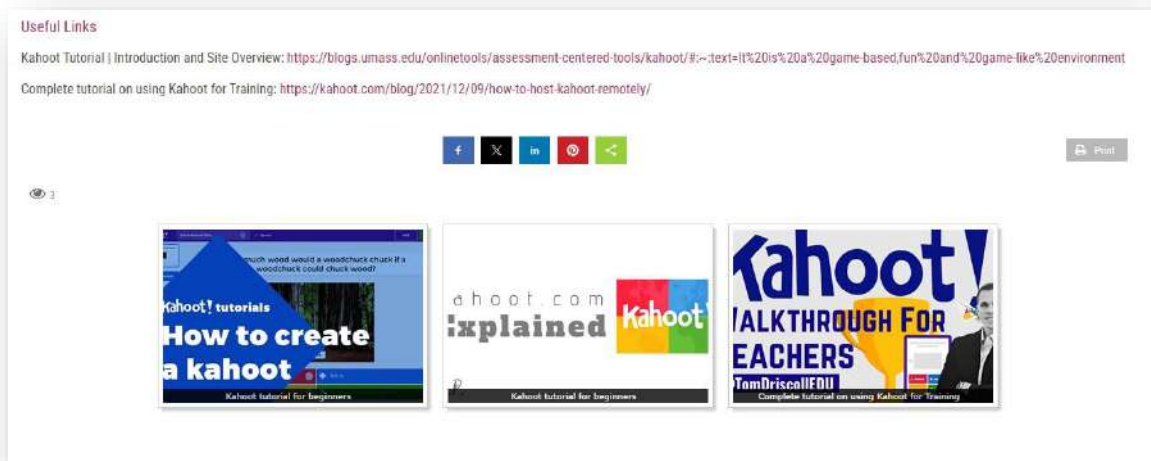

There are different tools for assisting in the delivery of synchronous online training organized under categories.

There also tags for filtering the proposed tools under each category. There is a detailed description for each tool with links and video tutorials.

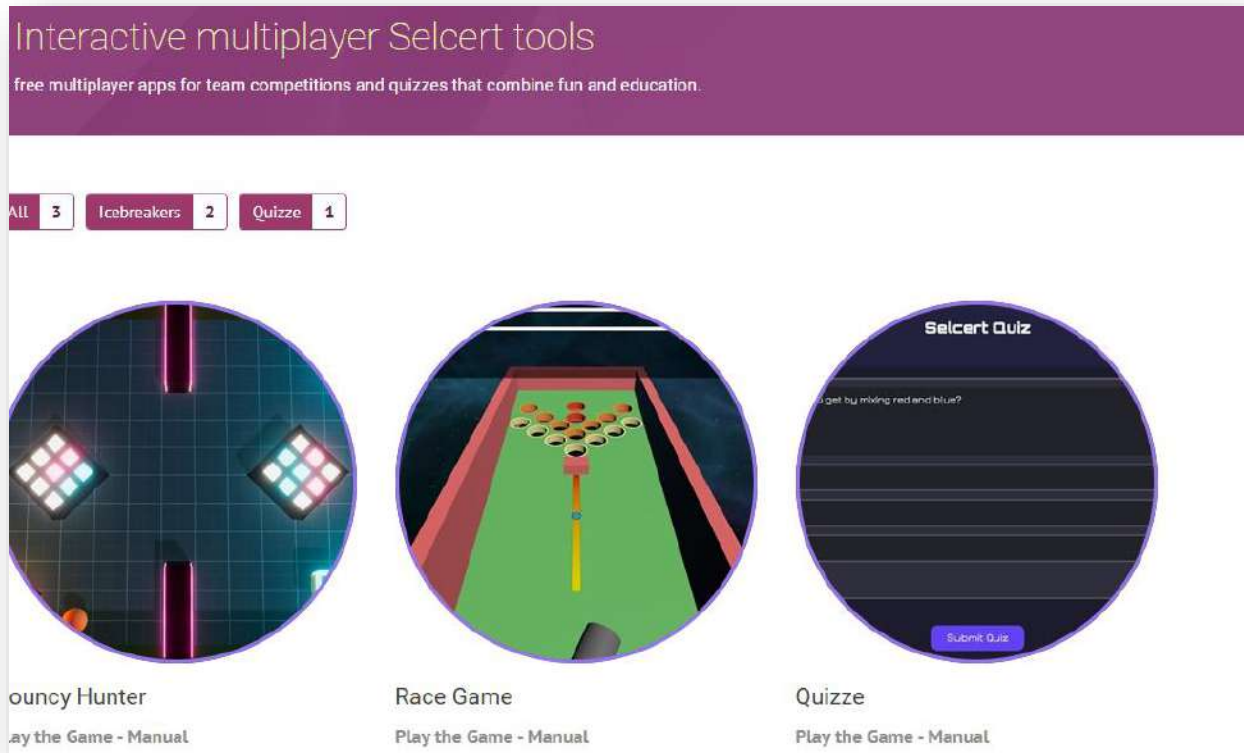

The screenshot shows the 'Digital Resources' section of the Selcert website. The header includes the Selcert logo, navigation links (Home, About, Digital Resources, Selcert Tools, Forum, FAQs, Contact Us), a login button, and a search icon. The date 'Friday, November 15, 2024' is displayed. The main heading is 'Digital Resources' with a subtext: 'Technology can assist Trainers of Synchronous Electronic Learning teachers in meeting the needs of learners in electronic learning environments. Some digital tools provide free access for educators and are beneficial to students.' Below this, there are tabs for 'Platforms', 'Icebreakers', 'Quizzes', 'Group work', and 'Evaluations'. A filter bar shows various categories with counts: All (16), Interactive Learning (16), Creativity (14), Engagement (13), Assessment (8), Accessibility (6), Collaboration (6), Customization (5), Virtual Classrooms (4), and Communication (4). Four tool cards are displayed: EdAPP, Flippity, Wakelet, and Wordwall, each with its logo in a circle.

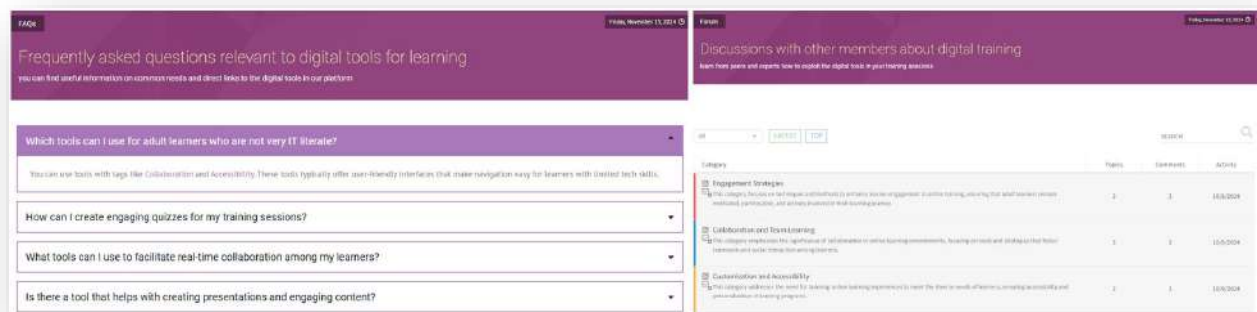

The screenshot shows the 'Useful Links' section. It contains two links: 'Kahoot Tutorial | Introduction and Site Overview: <https://blogs.umass.edu/online-tools/assessment-centered-tools/kahoot/#:~:text=It%20is%20a%20game-based,fun%20and%20game-like%20environment>' and 'Complete tutorial on using Kahoot for Training: <https://kahoot.com/blog/2021/12/09/how-to-host-kahoot-remotely/>'. Below the links are social media sharing icons (Facebook, Twitter, LinkedIn, YouTube, Email) and a 'Print' button. Three video thumbnails are shown: 'Kahoot! tutorials How to create a kahoot', 'kahoot.com explained', and 'Kahoot! TALKTHROUGH FOR TEACHERS' by YamDriscollFNU.

In the platform you can find also the SELCERT icebreaking tools that were developed in the framework of the project.

There are also tools like Frequently asked Questions and a Forum for members to exchange ideas and best practices.

Final transnational project meeting

The partners met in Krakow for the final face-to-face meeting of the project. The meeting took place on the 10th – 11th of October, 2024. Euro-Idea hosted and facilitated the meeting and it was an opportunity for the partners to discuss the final steps of the projects, the reporting process and requirements and future plans for the sustainability of the SELCERT results.
