

### GET TO KNOW GREENCOMP PROJECT

The GreenComp School project, funded by the ERASMUS+ Forward-looking Projects programme, is set to transform European education by implementing the European Commission's GreenComp framework. By integrating sustainability into formal, non-formal, and informal learning, the initiative equips learners—from early childhood through adulthood—with the essential knowledge and empathy needed to care for our planet. Ultimately, the project empowers a new generation to think, plan, and act with responsibility, ensuring public health and environmental harmony remain at the heart of our future.

### THE AIM

By embedding sustainability into every stage of life—from early childhood through adulthood—the GreenComp School project ensures that environmental responsibility becomes a lifelong habit rather than a one-time lesson. Through formal, non-formal, and informal learning, the project empowers individuals to plan and act with the planet's health in mind, fostering a future where living in harmony with nature is the global standard.

### ACTIVITIES

- **Competence Identification:** Defining clear GreenComp benchmarks specifically tailored for primary school educators.
- **Professional Development:** Creating a micro-credentialed Blended Learning program for current teachers and university students to instill a sustainability mindset in the next generation.
- **Interdisciplinary Tools:** Developing flexible, inquiry-based activities designed to integrate green competences into core subjects—from mathematics and computer science to literature and art.
- **Digital Innovation:** Launching a dedicated online platform featuring innovative digital materials and resources for all target groups.

Co-funded by  
the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

## THE FOCUS GROUP

The field research realised through the focus group methodology, which will be carried out by each GreenCompSchools partner, aims at validating GreenComp and redefining its competences for the primary school context. Furthermore, it will gather information that can provide valuable insights to support the project activities to be implemented.

In particular, you will get an updated version of the GreenComp framework adapted to the primary education context, as well as information on the training needs of teachers and students, and appropriate activities and games to make children and parents aware of sustainability. Parents, teachers, professionals and experts in the field of education and training are invited to attend.
