GREENCOMP SCHOOL UNVEILS THE CREATIVE PROCESS BEHIND ITS INNOVATIVE SUSTAINABILITY GAMES

The GreenComp School project is proud to release an exclusive "behind-the-scenes" look at the design and implementation of its newly launched educational games. This video journey captures the transition from theoretical framework to interactive classroom tools, highlighting how the project is making sustainability both tangible and engaging for primary school students across Europe. The core of these activities is rooted in GreenComp – The European Sustainability Competence Framework. By utilizing gamification, the project has successfully translated complex EU sustainability goals into practical challenges that foster teamwork, systems thinking, and environmental agency.

JOIN THE MOVEMENT

As the project enters its large-scale European pilot phase, the consortium invites teachers, students, and sustainability advocates to explore and test the GreenComp Games.
